# 10/22 - Client Meeting

- Forms - Ask Taylor, will look into it in the future.
  - Possibly already signed with the university
- Flow Sensor Readings are working
  - Test accuracy of the flow meter
    - Creation of a mock behavior
- GPS is getting readings however they are inaccurate
  - Possibly offsets - look at the specs sheet, understand units
- Firebase accounts need to be made not on one of our personal accounts
  - Possibly look into alternative options
  - Look for a more flexible one
    - List and understand it as a Design Constraint
    - Use a local database that can sync to online database later
      - For use in offline mode when internet connection is unstable
      - Build a round trip delivery confirmation, allowing for discard of local data after it has been confirmed
- Look into rotating groups for keeping development fresh and allowing everyone to gain knowledge of all parts of the team.
